Allison,

For some reason, I cannot open either of the documents. Would you mind sending them to me again?

Thanks

Alan

Hi Alan--

Looking good. I rearranged a bit more (this one, in particular, I found challenging to get everything down and have it flow well).

There is one main outstanding issue (besides filling in a citation for one of the footnotes). Since the state brought up the fact that many legacy roads have been revegetated and would create more disturbance trying to repair that just leaving them as is, I think we need to acknowledge that and explain why we disagree and still think its important to address these roads. I added a start for this discussion but do not know enough myself why we still need to address to flesh it out more completely. Hopefully you and Teresa can do that.

I've attached a clean and track changes version. Please make any future changes on the "clean" version since the track change is so messy I had to accept all changes before I could start reviewing.

Allison
